

Know more. Cut less.

Know how some things are simply better together? Like the knowledge that comes from a CT-based plan that captures each patient's unique anatomy, and Mako's AccuStop™ haptic technology, which helps you use this knowledge to precisely and accurately cut what you've planned.^{1,2,3}

So you know more and cut less.^{4,5,6,7*}

That's Mako. SmartRobotics™.

Visit makosmartrobotics.com to learn more.

* For the Mako Total Knee application, "cut less" refers to less soft tissue damage and greater bone preservation as compared to manual surgery.^{5,6} For the Mako Total Hip and Partial Knee applications, "cut less" refers to greater bone preservation as compared to manual surgery.^{4,7}

A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of any particular product before using it in surgery. The information presented is intended to demonstrate the breadth of Stryker's product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use before using any of Stryker's products.

Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your sales representative if you have questions about the availability of products in your area. Stryker Corporation or its divisions or other corporate affiliated entities own, use or have applied for the following trademarks or service marks: AccuStop, Mako, SmartRobotics, Stryker.
